

American aluminium clad wood windows and doors from Signature provide you with contemporary features and performance.

Designed around you.

Modern Architecture: the Benefits of American Aluminium Clad Wood Windows and Doors

Modern styles feature sleek, clean and classical lines to achieve simplicity and durability.

American aluminium clad wood windows allow for wide design possibilities in modern architecture since the aluminium exterior is slim and resistant, featuring a contemporary look.

Energy Efficiency

Another consideration when specifying windows and doors is the energy efficiency. Concern for the environment, thermal comfort and reduction of utility bills have gained a great importance on new build and replacement projects. In addition to the natural insulation material of the wood, the aluminium cladding adds to the energy efficiency of our windows.
