New Energy-Efficient Water-Tight Windows Solutions with Contemporary Slim Profiles

Meet the Signature Aluminium Clad Wood Window Range for Near Passive U-Values Standards

The **Signature Energy-Efficient Water-Tight Contemporary Window Range** is designed to achieve the highest energy efficiency, water-tightness and thermal insulation performance in the industry today.

This system features an innovative thermal break polymer that improves insulation to reach near passive U-values. Its traditional Scandinavian window design combines performance, refined appearance and cost-effectiveness.

Facts and figures

- Double Glazed Unit **U-Value = 1.1/1.2**
- Triple Glazed Unit **U-Value = 0.8/0.9 (Near Passive values)**
- Water tightness **Class E1200 (classification EN 12208)**
- Air permeability **Class 4 at 600 Pa (classification EN 12207)**
- Resistance to wind load **Class C3 (classification EN 12210)**

WINDOW RANGE BROCHURE**

Performance

Innovative draining system eliminates water sitting on or getting near the wood. Thermal break provides excellent U-Values and protection.

Appearance

Very slim profiles and fine lines for maximum natural light and a modern look. Tight gaps between sash and frames offer a refined appearance.

Cost-Effectiveness

Near passive standards reach water-tightness, air-tightness and thermal efficiency that helps reduce energy bills.
